TECHNICAL SKILLS

Languages: JavaScript (ES6+), TypeScript, SQL
Frontend: React.js, Redux Toolkit, Tailwind CSS, HTML5, CSS3
Backend: Node.js, Express.js, REST APIs, JWT Authentication
Databases: MongoDB, Mongoose
Deployment: Netlify, Vercel, Render
Tools: Git, GitHub, Postman
Other: Cloundinary, Multer, MVC Architecture, Middleware

EDUCATION

Institute of Technology, Gopeshwar Uttarakhand, India
B.Tech in Computer Science & Engineering 2021 – 2025
Veer Madho Singh Bhandari Uttarakhand Technical University, Dehradun

TRAINING EXPERIENCE

MERN Stack Trainee — QSpiders

- Hands-on training in HTML, CSS, JavaScript, SQL, React.js, Node.js, Express.js, and MongoDB.
- Completed practical assignments focused on full-stack development, debugging, and problem-solving.

PROJECTS

ShopAI — E-Commerce Web Application | *React.js, Node.js, Express.js, MongoDB, Mongoose, Tailwind CSS*
[\[Live Demo\]](#) [\[GitHub\]](#)

- Built a full-stack e-commerce application with customer/admin interfaces, implementing product search, cart, wishlist, checkout, order management, and admin analytics.
- Developed **49 REST API endpoints** with JWT authentication, protected routes, role-based authorization across **2 user roles**, and MongoDB-based CRUD, filtering, sorting, and aggregation.
- Integrated **Razorpay** for online payments and **Cloudinary** for image uploads; deployed frontend on Netlify and backend on Render.

Resume Builder Application | *React.js, Node.js, Express.js, MongoDB, Zustand*
[\[GitHub\]](#)

- Built a full-stack resume builder with a drag-and-drop editor, **6 professional templates**, public resume sharing, and resume management workflows.
- Developed **22 REST API endpoints** with JWT access/refresh authentication and protected routes; implemented CRUD operations and form validation using React Hook Form and Zod.
- Integrated AI-powered content enhancement using the OpenAI SDK and implemented responsive UI, Zustand-based state management, and security middleware including Helmet and rate limiting.

VideoTube Backend | *Node.js, Express.js, MongoDB, Mongoose, Cloudinary*
[\[GitHub\]](#)

- Built a RESTful backend with **41 API endpoints** for videos, comments, likes, subscriptions, playlists, tweets, watch history, and user workflows.
- Implemented JWT authentication, bcrypt password hashing, protected routes, ownership-based authorization, and reusable middleware using MVC architecture.
- Integrated Multer and Cloudinary for media uploads and implemented MongoDB aggregation, pagination, and CRUD operations for scalable data management.

GoGreenRaven — Client Website | *React.js, Tailwind CSS*
[\[Live Website\]](#) [\[GitHub\]](#)

- Developed and deployed a responsive client website using React.js and Tailwind CSS with reusable UI components and responsive layouts.
- Collaborated with a development team on task distribution, debugging, and production deployment for a live client-facing website.
